Education

Shanghai Jiao Tong University Shanghai, China

B. Eng. in Computer Science and Engineering *September 2019 – June 2023 (Expected)*

- GPA 94.27/100 (or 4.15/4.3), Rank 1/120
- Sensetime Scholarship (only 30 students national-wide), Tang Lixin Scholarship, Huawei Scholarship, Zhiyuan Honor Scholarship
- A+ Courses: all specialized courses (Operating Systems, Computer Architecture, Algorithm and Complexity, etc) and all mathematical courses (Mathematical Analysis, Linear Algebra, etc)

Coding Projects

- [Emiyalzn/Learn-to-Simulate]: Reproduce DeepMind's work in ICML'20. Add new GNN models and translate the DL framework to PyTorch, having achieved better simulation results.
- [Emiyalzn/Ride-Hailing-DataAnalyzer]: A cab traffic analysis software written in C++, based on Qt5 platform. Have implemented functionalities like traffic visualization, time prediction and route planning.
- [Emiyalzn/Online-Bookstore]: An online bookstore application based on React (frontend) and Springboot (backend). Have implemented functionalities like cart management, order management and statistical visualization.
- [Emiyalzn/Eff-mQRCode]: Course project for CS339-Computer Networks. Reproduce the work: mQRCode in MobiCom'19, using Pix2PixGAN to raise mQRCodes' decryption speed and robustness by a large margin.

Experience

Research September 2020 – Present

Shanghai Jiao Tong University *Thinklab*

- Quantum Machine Learning.
  2020.09 – 2021.04
- Neural Relational Inference for Multi-dimensional Temporal Point Processes via GNNs.
  2021.06 – 2021.08
- On Adversarial Attack and Defense for Combinatorial Optimization (submitted to ICLR'22).
  2021.08 – Present
- A Scalable Structure Learning Approach for GNNs (submitted to ICML'22).
  2021.10 – Present
- On Collective Robustness of Bagging (submitted to ICML'22).
  2021.12 – Present

Skills

Languages: Python, C/C++, JavaScript, Java, SQL, Rust.
Developer Tools: Pycharm, VSCode, Jupyter Notebooks, IntelliJ IDEA, Git.
Machine (Deep) Learning Related Knowledge:

- PyTorch (proficient), TensorFlow (able to read).
- Familiar with popular GNN models (GCN, GAT, GPRGNN, IDGL, etc).
- Understand common DL models (Transformer, GAN, VAE, etc).
